The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Germological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, I.D.Y. magnification, corrections. triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sura "m. Diamond Visu" spectraphotometer and such other instruments and/or processes as deemed appropriate by I.G.I. This Report includes accountly features. A duly accredited gemologist or jeweler can advise you with developed to the control section of the control section of the control section of the control section.
