CLARITY CHARACTERISTICS

KEY TO SYMBOLS

Red symbols indicate internal characteristics. Green symbols indicate external characteristics.

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). This is a manufactured (man-made) diamond produced by CVD (chemical vapor deposition) or by HFHT (high pressure high temperature) growth processes and may include postgrowth treatments to after the color. IGL employs and utilizes those techniques and equipment currently available to IGL, including, without limitation, IDX magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, spectraphotometer and such other instruments and/or processes as deemed appropriate by IGL in the case where diamond melee is set in a mounting, a random testing procedure, regarding the diamonds being of natural of laboratory created origin will be performed. This Report includes acknanced security features. A duly accredited gemologist or leweler can advise you with respect to the importance of and interrelationship between cut, color, clarify and card weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GENSTONE DESCRIBED HERBIN PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGLOROF.CERNS.HITLD.CR.CALL 18-88-8UY-161
