The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological institute (IG.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I., including, without limitation, 10X magnification, corrected implet louge, binocular microscope, master color comparison stones, non-contract-optical measuring device, Diamond Sure (**), Diamond View(**), Spectrophotometer and such other vanced security features. A duty accredited gemologist or seweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

SUBJECT: THE THEORY OF THE GENERAL OF THE GEMSTONE DE-SCRIBED HEREIN, PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE, FOR ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.
