KEY TO SYMBOLS

Red symbols indicate internal characteristics. Green symbols indicate external characteristics.

The laboratory grown alamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGLI). A laboratory grown diamond is one that has assentially the same chemical, physical and optical properties as a mined alamond, with the exception of being grown by man (a manufactured product). This is a manufactured (man-made) diamond produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post-growth treatments to after the color. IGL enalysis and utilizes those techniques and equipment currently available to IGL, including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contract-phical measuing device. Spectraphotometer and such orther instruments and/or processes as deemed appropriate by IGLI in the case where diamond melee is set in a mounting, a random testing procedure, regarding the diamonds being of natural of laboratory created origin will be performed. This Report includes advanced security features A duly accreated and origin y and server and such of the importance of and interelationship between cut, color, clarity and card weight. THIS REPORT is NETHER A GUARANTEE, VALUATION, NOR APRAISAL OF THE GEMSTONE DESCRIBED MEEMIN PLANE REVIEW THE MUNICIPAN AND RESTRICTIONS SET FORTH ONLINE. FOR
