The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (I.G.I.). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, 10% magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure <sup>18</sup>, Diamond View <sup>18</sup>, Spectraphotometer and such other instruments and/or processes as deemed appropriate by I.G. I his Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and internediationally between our color, clarity and calinty and calarity a
