

INTERNATIONAL GEMOLOGICAL INSTITUTE

LABORATORY GROWN DIAMOND REPORT

January 20, 2021	
IGI Report Number	LG457051309
Shape and Cutting Style	SQUARE CUSHION MODIFIED BRILLIANT
Measurements	7.64 X 7.52 X 4.89 MM
GRADING RESULTS	
Carat Weight	2.30 Carats
Color Grade	G
Clarity Grade	VS 1

ADDITIONAL GRADING INFORMATION

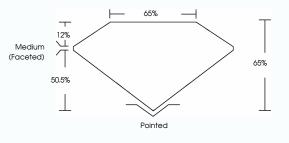

Polish	EXCELLENT
Symmetry	VERY GOOD
Fluorescence	NONE
Inscription(s)	LABGROWN IGI LG457051309

Comments: As Grown - No indication of post-growth treatment. This Laboratory Grown Diamond was created by Chemical Vapor Deposition (CVD) growth process.

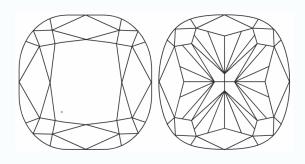

LG457051309

PROPORTIONS

CLARITY CHARACTERISTICS

KEY TO SYMBOLS

Red symbols indicate internal characteristics. Green symbols indicate external characteristics.

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Gemological Institute (IG.I). A laboratory grown diamond is one that has essentially the same chemical, phylical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). This is a manufactured (man-made) diamond produced by CVD (chemical vapor deposition) or by HPHT (high pressure high temperature) growth processes and may include post-growth treatments to after the color. IGI employ and utilizes those techniques and equipment currently available to IGA, including, without limitation, 10X parameterized and the laboratory in terms of the processes and now include post-growth treatments to after the color. IGI employ and utilizes those techniques and equipment currently available to IGA. Including, without limitation, 10X parameterized by the laboratory benefative processes and the color IGI employ and utilizes those techniques and equipment currently available to IGA. magnification, corrected triplet louge, binocular microscope, master non-contract-optical measuring device, Speatraphotometer and such other instruments and/or processes as deemed appropriate by IGL in the case where diamond melles is set in a mounting, a random testing procedure, regarding the diamonds being of natural of laboratory created origin will be performed. This Report includes advanced security features Adu/doctory created origin will be periodined, inits responsible doubles dorbited "security resolutes A du/doctoreffed genologies or gevere can advere valuation and the periodic of and interelationary between cut team and the control of the security of
